

# *Sustainable Christmas Hampers*

---

OHDEKO

Sustainable Christmas is not about the packaging - while we also start to make our business sustainable for our mother earth.

It's about sustainable relationships with our loved ones or people who accidentally get distant, we try to reach again.

Our hampers are meant to be enjoyed together with those of our hearts hold dearest. Sending hampers during holiday seasons could be felt shallow nowadays when it seems easier to feel apart. But, It's a heartwarming act to express your gratitude and try to make distant relationships closer.

It's a good feeling to know that someone remembers you.

Love,

*Oh deko*
